

ROTOVAC[®] DHX

Rotary Jet Extractor

High Performance Carpet Cleaning

Carpet Restoration PowerHead

Maximum Cleaning Results with Minimal Effort

It's a Money Making Machine!

The Rotovac DHX has an amazing ability to impress your customers as it thoroughly deep cleans and restores heavily soiled carpet conditions. Matted traffic lanes and stubborn stains can now be deep cleaned and restored with minimal operator effort. Your customers will become your cheerleaders and you will notice a dramatic increase in your referral business when you clean with the DHX.

Power Extraction Cleaning with Ease

The Rotovac DHX takes the backbreaking "wand fatigue" labor out of carpet cleaning. Dual high torque motors along with a comfortable ergonomically designed dual grip handle team up to make the DHX extremely easy to operate and maneuver.

VARIABLE HEAD SPEED CONTROL

The DHX is equipped with a variable head speed control dial which allows the operator to customize the head speed from 50 r.p.m. up to 250 r.p.m. This feature allows the DHX to adapt to a wide variety of carpets from direct commercial glue downs to plush installed over pad residential carpeting. Glue down carpets may require a slower head speed for smooth operation and maximum recovery while installed over pad plush carpeting may need a faster head speed for best results.

One Year Factory Warranty

The Rotovac DHX is industrially designed with only the highest quality materials to provide years of trouble free service. The DHX is backed by an iron clad warranty which covers all components of both parts and labor for one year from date of purchase. See warranty for details.
