# M1200, M1600, M2000 Ultra High Speed Burnishers

*All Models Give A Full 20 Inches of  
Total Pad to Floor Contact*

Provides a super high gloss without "cutting" or  
"rippling" the floor's surface sheen!

Shine your floors for years with trouble-free operation!

Powr-Flite ultra high speed burnishers will bring the life back to almost any hard floor surface easily and quickly. These machines offer exceptionally smooth operation with a flexible, self-adjusting pad driver that burnishes unlevel surface areas evenly. Our patented housing design combined with

precision balanced weight distribution eliminates the need for a compensating caster. The entire pad is touching the floor, not just a couple of inches like conventional burnishers!

The floating all-steel handle has anti-fatigue grips, taking the strain off the operator's arms and hands. The industry's toughest left- or right-handed control levers means easy operation from either side of the machine. A safety UL listed 75' cord with heavy-duty steel strain relief comes with each burnisher.

◆ Floating handle for easy operation

◆ Easy access to motor and internal components

◆ Patented one-piece vented housing

◆ No compensating caster

◆ Full pad-to-floor contact

# P1500

## Ultra High Speed Burnisher

*Burnish and Remove Scuff and Heel Marks with Total Direct Drive Power!*

- ◆ Direct drive
- ◆ Patented pad pressure control
- ◆ One piece rotational molded housing
- ◆ Easy motor access
- ◆ No compensation caster means full pad-to-floor contact

The P1500 burnisher is excellent for scuff and heel-mark removal in heavy-traffic areas. The compact design offers easy maneuverability and total operator control of the pad pressure. If your traffic areas requires weekly maintenance, choose the P1500 for its aggressive floor contact! Rear transport wheels provide smooth and easy mobility.

With total direct drive all power is on the floor for maximum shine capability. Pad pressure stays on the floor with patented pad pressure control.

### Model P1500 SPECIFICATIONS

Pad Diameter	20 Inches Full Pad-to-Floor Contact
Motor	1-1/2 hp D.C. Rectified, UL Listed
Transmission	Direct Drive
Power Cord	75 ft. UL Listed 14/3 SJTW-A
Base Housing	One Piece, High Density Polyethylene
Pad Driver	Factory Installed Rigid Block Drive
Pad Pressure (lbs)	9-17
Handle Grips	Anti-Fatigue, Soft to the Touch
Cord Strain Relief	Heavy Duty Metal, Lock Nut and Spring
Handle Tube	All Chrome 1-1/2 Inch (Fixed)
Handle Lever	Case Hardened Steel, Positive Lock
Operating Wheels	4 Inch Non-Marking-Self Lubricating
Transport Wheels	4 Inch Non-Marking-Self Lubricating
Wiring	All Completely Enclosed in Housing
Switch Housing	Non Conductive- Commercial Grade
Operation Control	Dual Lever On-Off Safety Switch Stress Absorbing. Left or Right Hand.
Warranty	10 Yrs Housing, 2 Yrs. Motor, 1 Yr. On Parts & Workmanship
Work Rating (ft <sup>2</sup> / hr)	22,000
Shipping Weight	85 lbs.

## If Your Burnisher is Not a Powr-Flite, Chances Are it WILL FAIL the Pad Pressure Test.

Take a look at the used pad currently on your burnisher. Is the pad worn completely or just partly? The wear on the pad indicates the amount of pad pressure on the floor (if the pad shows only an inch of wear, then you are burnishing only an inch at a time).

With that kind of performance, you have to make more passes on the floor, wasting your time, energy and money. Think of the savings if your pad covered more area.

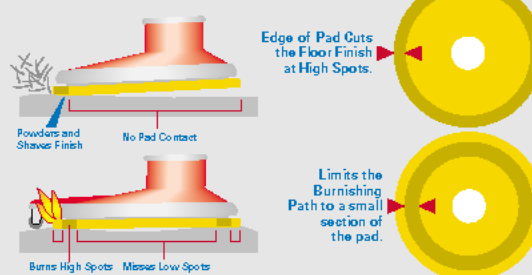

With the Powr-Flite Burnishing Fleet, you get Total Pad-to-Floor Contact. With each pass you make, the pad covers evenly and completely. No wasted time. No wasted energy. No wasted money.

The design and engineering of the Powr-Flite line provides superior performance and precision balance without the need for a compensating caster. Not only are Powr-Flite burnishers more maneuverable, but there is no wheel to prevent the pad from covering the floor.

With Powr-Flite, you can pass the Pad Pressure Test. . .

**And Shine Flat or Uneven Floors!**
